"System Design" – Pre-Exam-Task
– *Initial Steps [01]*

This task is part of the pre-exam-requirements. You have to present your results in the session at 19th October.

1   Individual Project (Individual Task)

For a project you have done during your bachelor course or during your job come up with the "Initial Vision" as proposed in the lecture.

Fill out the PowerPoint-project form you find in Moodle and do an individual 5-minute presentation.

2   Software Project (Group Task for Software Technology)

For the software project you have been assigned to, come up with the "Initial Vision" as proposed in the lecture. Again, fill out the PowerPoint-project form you find in Moodle

Additionally

- Give the project organigram (who has which role)
- Identify requirements and influences
- Identify possible risks
- Identify test cases
- Describe the Deployment View

and add them to the project presentation

Present your results in the group (5-15 min)
